NUMBER 91.

JUST TWELVE MINUTES

Consumed In the Passing of
the Defense Bill.

NOT A DISSENTING VOTE.

Party Lines Swept Aside as Was
Done In the House.

THERE WAS DIGNIFIED SILENCE.

The Work Was Accomplished So Quickly
That People In the Gallery Hardly
Realized That the Measure
Had Become a Law,
Virtually.

Washington, March 10. — President McKinley's hands have been upheld by both branches of the American congress. With enthusiasm, fervor and promptness almost unparalleled in the senate in time of peace that body passed the emergency appropriation bill, carrying \$183,000 of deficiencies and placing at the disposal of the president \$50,000,000 for national defense.

The vote by which the measure was passed was unanimous. Seventy-six short, sharp and emphatic speeches were delivered in favor of the bill, each one being simply a ringing "aye" during the rollcall upon the passage of the measure.

Not only did every senator present register his vote in favor of the bill, but for every absent member the authoritative announcement was made that if he were present he would vote "aye."

From the time the bill was presented to the senate by Mr. Hale of Maine until it was passed not an inharmonious note was sounded.

PASSED IN TWELVE MINUTES.

It was just 12:13 when Mr. Hale reported the bill to the senate and asked that it be placed on its passage. The members of the committee on appropriations had previously effected an arrangement whereby there would be no debate on the bill, and after it was read Vice President Hobart placed it immediately on its passage.

Twelve minutes after the bill was reported to the senate the vice president announced its unanimous passage.

The great work was accomplished so quickly that most of the people who crowded the galleries scarcely realized that the measure, so far as congress was concerned, had become a law.

Some of the spectators fully grasped the meaning of the senate's action, and when the announcement of the vote was made a murmur of applause ran through the galleries.

The members of the senate, however, maintained dignified silence, the realization among all of them being keen that a situation which warranted the passage of so unusual a measure was too grave to prompt an outburst of applause.

Earnestness and determination were evinced on both sides of the chamber, but there was not a note of levity that would detract from the seriousness of the work performed.

FEATURE OF THE DAY

Was the Final Passage of the National
Defense Bill.

Washington, March 10.—The feature of the day's events was the promptitude with which the senate passed the house bill carrying the appropriation of \$50,000,000 for the national defense, and the haste with which it was put through the formal proceedings, engrossed and signed by the president.

The fund has not yet been allotted among the various branches of the government service. Warships will be considered first.

The secretary of the navy is making every effort to secure from our naval attaches and diplomatic officers abroad all information obtainable respecting the number of ships building, their price and other data.

There are many applications coming to the department from persons and firms who desire to sell ships to the government, but in most of these cases either the craft offered is not suitable

for naval needs, or the date of possible completion is so distant—from three months upward—that it can not be regarded as worthy of purchase to meet an emergency.

The navy department has assured itself of an abundant supply of certain kinds of smokeless powder abroad at short notice.

The representatives of the armor-making firms are in consultation with the department steadily, generally relative to the supply of gun forgings and such material for use in the gunshops here and at Watervliet.

The question of armor is receiving little attention, as the armor-makers report that they can not undertake by any known agency to turn out such armor as would be required for a modern battleship in less than seven months.

Thus, it has been demonstrated to the navy department that it will not be possible to make the armor for the superb battleships, three in number, now building at Newport News and at Cramps and at the Union Iron works in San Francisco in time to render these ships—far better, it is claimed, than any others from abroad for sale—available for any emergency that may arise this year.

The statement was made at the navy department that the report of the Maine court of inquiry probably would come to the department some time next week.

Admiral Sicard has been authorized to enlist suitable men for the navy at Key West if he can find the material. He reported that he had received some applications from machinists and seamen, and was immediately given the power to take the men.

Official reports indicate that the autonomy scheme projected for Porto Rico has been put into successful operation. This is interesting mainly because of resemblance between the project and the plan which it is now sought to put in play in Cuba.

The war department is arranging to secure a large supply of the most modern rifles, sufficient in time of emergency to arm a force of 500,000 men.

It was stated by high officials of the department that no board was necessary to inquire into the merits of the various guns on the market, but that the department would turn to the best sources of supply.

These, it is said, are ample within the United States to turn out rifles of the most approved pattern as fast as the government wants them.

IN HAVANA HARBOR

Is the Big American Cruiser Montgomery
at Last Moved.

Havana, March 10.—The arrival here of the Montgomery was very quiet, it being generally understood that she comes to replace the coast survey steamer Fern as quarters for Captain Sigsbee and others.

Commander Converse of the Montgomery is a high authority on explosives, and his advice will be useful to the court of inquiry into the loss of the Maine.

After firing the usual salute and being saluted in return, the Montgomery was moored in the principal harbor near the wreck of the Maine and in the center of a circle of Spanish warships.

The Montgomery is as trim and neat as possible. Nobody is allowed on board without permission, but nobody is excluded if business or courtesy demands the admission of the visitor.

SPANISH TREACHERY

Was Responsible for the Destruction of
the Cruiser Maine.

Washington, March 10.—From a source little short of official it is learned that the testimony taken by the court of inquiry shows that the Maine was blown up through Spanish treachery.

As soon as the ship had come to anchor in Havana harbor a conspiracy was formed for its destruction.

Among the conspirators were Spanish officers and volunteers.

This accounts for the sudden reversal of the administration's Cuban policy.

When that report is made public President McKinley will not demand indemnity.

He will simply transmit the report to congress and war is certain to follow.

No report is expected until the administration is ready to begin hostilities against Spain.

Bring the Bodies Home.

Washington, March 10.—Representative McClellan of New York introduced in the house a bill appropriating \$100,000 for the return of the bodies of the Maine victims to the United States and their burial at public expense at such places as the relatives of the deceased might designate. The unknown dead, by the terms of the bill, are to be buried in the National cemetery at Arlington, and a suitable monument is to be erected to their memory.

AGAINST THE BISHOP

Have Eleven States Voted, So
It Is Alleged.

OHIO MAN IS NOT WANTED.

However, the Brown Side to the Controversy Do Not Concede Any Formidable Opposition and Appear Satisfied.

Little Rock, March 10.—Chancellor William C. Whipple of the diocese of Arkansas said that up to date 11 states have voted against the consecration of Archdeacon Brown of Ohio as bishop coadjutor of Arkansas.

The Brown side to the controversy claim that 24 dioceses have voted in favor of consecration, but the opposition does not concede all of that number.

Should the opponents of Archdeacon Brown be defeated before the standing committees the case will be appealed to the house of bishops.

Cincinnati, March 10.—Ex-Cashier T. B. Youtsey, on trial before Judge Taft, in the United States court in Covington, Ky., fell in an epileptic fit during the trial. He is reputed to be worth \$100,000.

Indianapolis, March 10.—The Republican state committee met for the purpose of completing the party organization for the state campaign.

All the members of the committee were present or were represented by proxy when Chairman Hernley announced his executive and advisory committees.

The sentiment of the committee was that in view of the unsettled state of national affairs it might be well to wait a few weeks before fixing a date for the state convention.

The committee fixed the basis of representation on the state convention at one delegate for every 200 votes and a fraction of over 100 votes cast for the first elector on the Republican ticket in 1896.

FITZGERALD LEE: "I shall continue to do my duty, which is to guard American interests."

As long as the people fill the Legislature with aspiring politicians, they needn't expect much legislation for the public good.

Poor old Spain! She's cutting quite a sorry figure as a nation these days. By the time Uncle Sam gets through with her, there'll not be much left.

UNDER the present law, if a person owns a piece of real estate and still owes a part of the purchase money, he is not allowed to deduct his indebtedness from the total in giving it in for assessment. The House has passed a bill, however, authorizing a taxpayer, when he gives in his list to the Assessor, to deduct the lien notes and mortgages owing by him from the value of the remainder of his property. The party who holds the lien notes certainly ought to pay the taxes on them, and owners of property certainly ought to have the right to deduct their indebtedness; otherwise, there is double taxation.

A Close Relationship.
The relationship which the baking powders bear towards our health is coming to be appreciated.

There is no doubt that the indigestion and dyspepsia of which many Americans complain are caused by the indiscriminate use of alum baking powders. These baking powders, from their lower price, from the persistency with which they are advertised as pure cream of tartar powders, or from the tempting schemes with which they are offered, are being purchased by many housekeepers. That alum baking powders are unwholesome is a fact as well established as that arsenic is a poison. There must accordingly be the greatest care exercised by the housewife to keep them from her food. A chemical analysis only will expose their true character. Even the price at which they are sold is not always a mark to identify them.

There is certain safety in the use of the well known brand, Royal Baking Powder. The Royal is not only certified by the Government chemists free from alum and from all adulteration, but every housewife feels a confidence when using it which she cannot have with any other powder. It is made from chemically pure cream of tartar, and is actually an anti-dyspeptic, promoting digestion and adding to the wholesomeness of the food.

Walker, and his uncle, Mr. John B. Gibson, leaving here on No. 3.

A Narrow Escape.
Thankful words written by Mrs. Ada E. Hart, of Groton, S. D. "Was taken with a bad cold which settled on my lungs; cough set in and finally terminated in consumption. Four doctors gave me up, saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for consumption, coughs and colds. I gave it a trial, took in all eight bottles. It has cured me, and thank God I am saved and now a well and healthy woman." Trial bottles free at J. Jas. Wood's drug store. Regular size 50c. and \$1. Guaranteed or price refunded.

THE GOVERNOR'S CLAIMS.

He Thinks the Bronston Prison Bill and the Goebel Election Bill Are Both Void.

FRANKFORT, Ky., March 8.—The Republicans have appeared to be very complacent in talking of the Prison Commission bill and the Goebel Election bill, and have smiled knowingly in saying that neither law would become effective. The reason for this complacency was given out in the following interview by a close friend as to the Governor's idea as to the constitutionality of the two proposed measures:

"The Governor, in vetoing the Prison Commission bill, did not mention the fact that the bill was unconstitutional in so far as it made the term of one of the officers six years, which is a violation of Section 93 of the Constitution, which limits the term of an inferior State officer not provided for by the Constitution to four years. Again, he did not veto that bill on the ground that an emergency could not be enforced without his approval. He omitted to refer to both of these matters because he feared the Prison Commission bill might be remedied by amendment so as to drop the emergency and let it go into effect ninety days after adjournment, and place the appointment or election of commissioners in the hands of some other power of the State friendly to the promoters of the bill. But, now, when it is too late to amend the bill he announces these fatal objections, and the veto of the Goebel bill will refer at length to the matter. Section 55 of the Constitution, which enables the Legislature to declare an emergency so as to make a bill go into effect at an earlier time than ninety days after adjournment, especially provides that after such emergency is declared and the reasons given therefor the act may become a law when approved by the Governor. The Governor having failed to approve the law it can not go into effect until ninety days after adjournment, thus postponing its effectiveness. No election can be held of either the Prison Commissioners or Election Commissioners, and the machinery for carrying these acts into effect can not be provided until the meeting of the next Legislature in 1900."

Senator Goebel says he is not at all disturbed as to the constitutionality of the Election bill, and other Democrats say that Section 58 of the Constitution settles beyond question that an emergency bill or any other kind of a bill becomes a law after being passed over a veto, at the same time it would have become a law if the Governor approved. Senator Bronston has been in conference with the Governor as to the six year term of the Commissioners, provided for in the Prison bill, and when the Republicans test the matter in court it may prove a serious question.

OVER \$5,000 NOW.

Maysville Property Owners Asked to Aid Washington Fire Company—Subscriptions to Date.

The following is self-explanatory:
To the Property Holders and Citizens of Maysville: On Sunday morning, January 30th, the Washington Fire Company lost by fire their home, together with the opera house upon which they depended for their support and upon which our citizens depended for an amusement hall. In the destruction of the building there went up in smoke and flame the hard earnings of the company, covering a period of forty-eight years and amounting to over \$12,000. They are now without shelter and without a single dollar—nothing left save their honor. The firemen of our city have always been faithful to duty in saving your property, and upon many occasions have saved our city from total destruction. It is now proposed, and due them, to rebuild their home, and for this purpose a subscription has been started and a liberal amount secured. Will you be one to assist in this effort by a subscription? Respectfully,
THOMAS A. DAVIS,
ALEX. CALHOUN,

LOOK TO YOUR INTEREST AND GET THE GENTLE

OLIVER CHILLED PLOWS!

They are the best on the face of the globe. There are many reasons why you should use nothing but the OLIVER CHILLED PLOW. Here are a few:

First—They are the original and only genuine Chilled Plows made.

Second—The mouldboards are thoroughly chilled, have no soft spots in them, will scour in any soil and will not wear out in ten years' plowing.

Third—The Oliver's chilled metal will not corrode. The heaviest coat of rust that can accumulate on it will be entirely removed by a few minutes' use, and the mouldboard will be as bright and smooth as before.

Fourth—The Oliver has a thorough center draft, runs lighter than any other plow and is under the direct and complete control of the operator.

Fifth—The Oliver is economical in repairs, and when your share is renewed you have an entirely new cutting edge.

Sixth—The Oliver Chilled Plow has hundreds of imitators. No manufacturer will try to imitate an inferior plow.

Seventh—For ease of management, adjustment and lightness of draft, it has no successful competitor.

Eighth—Your neighbors will tell you to buy the Oliver and take no other. They speak from faith born of experience.

ATTEMPTED JAIL DELIVERY.

Criminals Try To Escape From the Vanceburg Prison, But Are Foiled.

VANCEBURG, Ky., March 9.—Terror reigned in the county jail here for a while last night. Sam May, who has broken jail here half a dozen times, was imprisoned yesterday. Sam concluded last night he would get out. He got an iron bar, and commenced fighting the other inmates, nearly killing two during the fight. The stove was upset, setting the jail on fire.

The flames were extinguished after the inmates had nearly all suffocated. All the prisoners came within an ace of escaping, among them the two Crow girls, who were the principals in the desperate fight at Esculapia with officers several weeks ago, where one life was lost.

Officers have been sworn in to guard the jail.

The sick man knocking at the door of health gets in if he knocks the right way, and stays out if he doesn't. There are thousands of ways of getting sick but only one way to get well. Do whatever you will, if you do not put your digestion in good order, and make your blood rich and pure, you will not get well. Rich, pure blood is the only thing that can bring perfect health. Constipation is a disease of the blood. A large part of all diseases are traceable directly to impurities in the blood, and can be cured by eliminating them with Dr. Pierce's Golden Medical Discovery. The first thing it does is to put the whole digestive system into perfect order. It stimulates the appetite, excites a copious secretion of the digestive fluids and promotes assimilation. It searches out disease germs wherever they may be, kills them and forces them out of the system. The "Golden Medical Discovery" has been used with unvarying success for over 30 years.

THROUGH LAST STAGES

Went the Legislative, Executive and Judicial Bill.

Washington, March 10.—In the house the legislative, executive and judicial appropriation bill went through its last stages in the adoption of the final conference report, and the remainder of the day was consumed in the consideration of the senate amendments to the Indian appropriation bill. The substitute for the senate provision regarding the opening of the Uncompahgre reservation was knocked out on a point of order and the amendment goes back to conference.

The desire of the conferees to non-concur in the senate free homestead clause encountered bitter opposition, and an arrangement was made whereby four hours are to be devoted to debate a proposition to confer submitted by Mr. Eddy of Minnesota.

Mr. Sherman, chairman of the Indian committee, declared that the free homestead provision would cost the government \$55,000,000.
